

## WELCOME

We are excited to see our numbers climbing and this month saw us pass 500 enrolments! The team at St Vincents led by Associate Professor John Mills enrolled our 500th infant and were the lucky recipients of a hamper of goodies to congratulate them. The race is now on to see who will enrol our 600th baby...!?!

We have 3 sites in NSW being activated in the coming month in Blacktown, Wollongong and Campbelltown. And here in Melbourne, RWH will be the first of our sites to crossover this month. Treatment crossover dates have been recalculated so ensure you check below for when your site is scheduled for crossover.

**518**   
**infants**  
**enrolled**

## TRIAL PROGRESS

No.	Site Name	Planned Site Activation	Open & enrolling	Planned Crossover Date

27	Campbelltown Hospital - NSW	Q1 2024		Pending
28	Westmead Hospital - NSW	Q2 2024		Pending
29	Royal North Shore - NSW	Q2 2024		Pending

Congratulations goes to the team at **Mercy Hospital for Women** for getting started in this last month and enrolling their 1st baby into the AIROPLANE trial - we appreciate all the hard work of the trial team to get to this point.

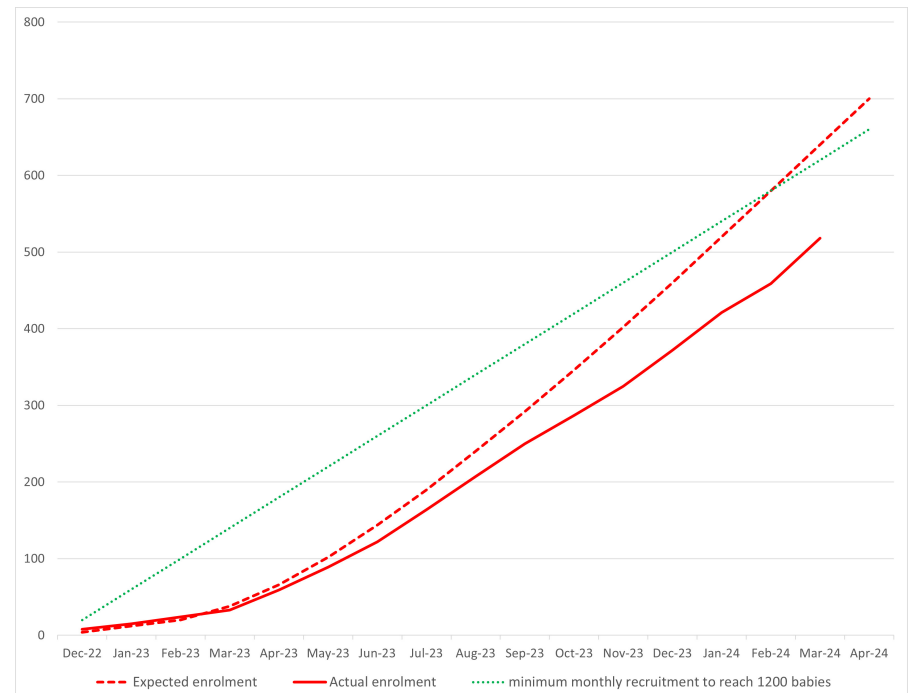

Congratulations also goes to the teams at **Blacktown Hospital, Wollongong Hospital** and **Campbelltown Hospital** now having completed their clinical training and SIVs and are ready for activation. Well done to all!

## UPDATES & ANNOUNCEMENTS

A Protocol Amendment endorsed by the Trial Steering Committee has been submitted which details the planned process for treatment crossover at each site. This amendment has been approved by the lead Ethics and now requires approval by each sites Research Governance Office.

Renae will be facilitating the submissions through the ERM and alerting all site leads when they are required to sign the submission. Please look out for this email from the ERM and attend to it in a timely manner.

## TRIAL RECRUITMENT

Many thanks to all the hard working staff at our recruiting centres for enrolling infants into the trial.

## REMINDERS & RESOURCES

### PROTOCOL DEVIATIONS

We have noticed a significant decrease in the frequency of protocol deviations. Thank you to all sites for their compliance with the AIROPLANE protocol. So we can keep this trend going, please highlight to all staff that the allocated oxygen concentration must be delivered for the **WHOLE 3 MINUTES**. Any changes in this time, unless clinically indicated by HR<60 or need for ETT, results in a minor protocol deviation.

Don't forget about **TIMEPOINT 2** data! At the time of Discharge or Transfer from your hospital, all enrolled infants require data entered into REDCap

We have a safety review just around the corner when we reach 600 recruits, and it will be essential that all data, including discharge data is entered as soon as possible and is ready for review
